

Gabo Esquivel

Sr Software Engineer focused on user-centric innovation, Web3 and AI.

About

I'm a full-stack software engineer with over 15 years of experience assisting organizations in crafting and evolving software products from initial concept to successful market launch, ensuring ideas are realized to their full potential. My approach is rooted in agile methodologies, striving for precision in technology implementation. I am fluent in English, Spanish, Portuguese, and Italian.

Experience

Bitlauncher

AI & Web3 Launchpad

- Full-stack architecture and oss management.
- Integrated gnosis auction solidity contracts.
