Gabo Esquivel

Senior Full-Stack Product Engineer

I build web and mobile products from frontend interfaces through backend services, databases, and cloud infrastructure. My experience spans 15+ years of TypeScript, JavaScript, React, React Native, Next.js, Node.js, and PostgreSQL, with product work across fintech, AI, Web3, and consumer applications. Fluent in English, Spanish, Portuguese, and Italian.

Highlights

- 12+ years delivering 0→1 software products for startups and growth-stage teams
- Built Wink's React Native banking application, AWS backend, and bank integrations
- Developed Bitlauncher's auction, wallet, bridge, and indexed blockchain systems
- Delivered AI applications with voice, chat, retrieval, and administrative interfaces

Experience

Software Engineer, LegalAgent

Remote • Contract • 2025

AI legal software combining bilingual voice, chat, document retrieval, and internal administration tools.

- Shipped a voice and chat assistant in React Native (Expo).
- Built RAG for case context and document summaries.
- Built the admin with Microsoft SSO, documents, and retrieval.

Product Engineer, Bitlauncher

Remote • Full-time • Nov 2023 – Nov 2025

AI and crypto launchpad combining token auctions, wallets, cross-chain transactions, indexed data, and research assistants.

- Owned product decisions and delivery planning while architecting the full stack.
- Built the launchpad on Next.js 14, Supabase, viem, and wagmi.
- Built the token bridge and Gnosis auction flows, from EOS EVM contracts to the bidding interface.
- Indexed transactions in Supabase for queries, subscriptions, and aggregate market data.

Lead Engineer, Bitcash

Remote • Part-time • Jan 2020 – Jul 2021

Cryptocurrency and stablecoin exchange with peer-to-peer trading, realtime messaging, and browser-based signing.

- Built the React, Vite, Node.js, PostgreSQL, Hasura, and Google Cloud stack.
- Built the peer-to-peer exchange, realtime chat, and matching engine.
- Built WebAuthn key management for in-browser transaction signing without an external wallet.

Lead Engineer, Wink

On-site • Full-time • Apr 2015 – Mar 2018

Lead-engineering role on Wink's React Native mobile application, AWS backend, and partner-bank integrations.

- Built the first version of Wink's React Native mobile application and AWS backend.
- Selected the initial technology stack and established the application architecture.
- Integrated partner-bank APIs for deposits, transfers, and account information.
- Implemented biometric identity verification and authentication through a React Native native bridge.
- Helped establish the engineering team responsible for the product's launch.

Lead UI Engineer, AMC Networks

Hybrid • Full-time • Nov 2012 – Apr 2014

AMC's interactive movie-rental platform with Brightcove streaming, chapter playback, and in-player content.

- Built the interactive movie-player frontend.
- Wired Brightcove for streaming, chapter playback, and back-office editing.
- Built Facebook identity, sharing, and in-player extras.

Additional experience

Other full-stack work includes Knowledge's ERC-20 token platform (2017–2018), EOS Costa Rica's blockchain infrastructure (2018–2020), Emanate's music application (2019–2020), RareMint's NFT marketplace (2021–2022), ZTX's virtual-world integrations (2022–2023), and Opyn's indexed trading application (2024–2025). Earlier, I built interactive streaming interfaces at AMC Networks (2012–2014) and financial marketing applications at American Express (2010–2012).

Connect

Open to direct hire, international hire, or contracting through Blockmatic Labs LLC. Cannot work under W-2. Based in Costa Rica, working US Mountain Time. Fluent in English, Spanish, Portuguese, and Italian.
