Gabo Esquivel

Senior Product Engineer, AI

I build production AI products: voice and chat assistants, retrieval, and the admin tools a team needs to run them after launch, on top of 15+ years of TypeScript, React Native, Next.js, and cloud work. Fluent in English, Spanish, Portuguese, and Italian.

Highlights

- 12+ years building 0→1 products for startups and growth-stage teams
- Shipped LegalAgent's bilingual voice and chat assistant with RAG over case context and documents
- Built the bitlauncher.ai RAG chatbot and Masterbots chat prompting on production launchpad products
- Led engineering for Wink, Costa Rica's first neobank, from architecture to launch

Experience

Software Engineer, LegalAgent

Remote • Contract • 2025

AI legal platform with voice, chat, and retrieval for case context, documents, and procedures.

- Shipped a voice and chat assistant in React Native (Expo).
- Built RAG for case context, document summaries, and procedural guidance.
- Built the TanStack Start admin with Microsoft SSO, system prompt management, and document categorization for retrieval.
- Shipped bilingual voice with realtime transcription and speech synthesis.
- Tuned the AI agent's persona and AI SDK tool-calling from attorney usage.

Product Engineer, Bitlauncher

Remote • Full-time • Nov 2023 – Nov 2025

AI and crypto launchpad with retrieval, research tools, and specialized assistant work.

- Owned product direction, roadmap priorities, and delivery planning while remaining hands-on in architecture.
- Built the bitlauncher.ai chatbot with RAG and tools for current news and video.
- Implemented Masterbots prompting and AI-assisted internationalization.

Software Engineer, Opyn

Remote • Contract • Oct 2024 – Feb 2025

Opyn Markets perpetuals on Arbitrum with a trading interface and indexed onchain data.

- Prototyped an LLM assistant for onboarding and support.

Lead Engineer, Bitcash

Remote • Part-time • Jan 2020 – Jul 2021

Fiat-to-stablecoin and crypto exchange with peer-to-peer trading, chat, and browser signing.

- Built the React, Vite, Node.js, PostgreSQL, Hasura, and Google Cloud stack.
- Built the peer-to-peer exchange, realtime chat, and matching engine.
- Built WebAuthn key management for in-browser transaction signing without an external wallet.

Lead Engineer, Wink

On-site • Full-time • Apr 2015 – Mar 2018

Costa Rica's first neobank: React Native app, AWS backend, partner-bank APIs, and biometrics (holawink.com).

- Built the React Native app and AWS backend.
- Built biometric KYC with a React Native native bridge.
- Coordinated with partner-bank teams and vendors on the first version.
- Integrated partner-bank APIs so deposits, transfers, and account data moved through the app.

Additional experience

Between those roles I led engineering at EOS Costa Rica (2018–2020), from the EOS mainnet launch to a consulting firm's private-chain MVP, and worked on Emanate's streaming platform (2019–2020). On the Web3 side I also built RareMint's NFT indexer and marketplace (2021–2022) and ZTX's WebGL wallet connector (2022–2023). Earlier I led frontend for AMC Networks' YEAH! (2012–2014) and built card marketing products at American Express (2010–2012).

Skills

- **Languages:** TypeScript, JavaScript, SQL
- **AI / ML:** LLMs, OpenAI, AI SDK, RAG, Realtime Voice
- **Frontend:** React, Next.js, React Native, Expo, Tailwind, shadcn/ui, TanStack
- **Backend:** Node.js, PostgreSQL, Supabase, Redis, GraphQL
- **Cloud & Infra:** AWS, GCP, Vercel, Docker, Serverless
