

Gabo Esquivel

Senior Full Stack Engineer

I design and ship end-to-end software systems spanning full-stack applications, AI products, APIs, and onchain integrations. With 15+ years of experience, I help teams turn ideas into market-ready products across web, mobile, and cloud, working closely across engineering, product, and user experience. Fluent in English, Spanish, Portuguese, and Italian.

Highlights

- 12+ years building 0→1 products across startups and growth-stage teams
- Led engineering for Wink, Costa Rica's first neobank, from architecture to launch
- Delivered full-stack systems across fintech, AI, Web3, marketplaces, and consumer products
- Deep crypto experience across smart contracts, tokenized systems, and infrastructure

Skills

- **Languages:** TypeScript, JavaScript, Python, Solidity, SQL
- **Frontend:** React, Next.js, Tailwind, Shadcn UI, React Native, Expo, Tanstack
- **Backend:** Node.js, PostgreSQL, Supabase, Prisma, Drizzle, GraphQL
- **Web3:** Foundry, Hardhat, Viem, Wagmi, Ponder, Ethers
- **AI / ML:** LLMs, AI SDK, RAG, Embeddings, Vector Search, Agent Workflows
- **Cloud & Infra:** AWS, GCP, Azure, Docker, Vercel, Pulumi, Terraform, Serverless

Experience

Software Engineer, LegalAgent

Remote • Contract • 2025

AI legal platform: assistant with voice and chat for case context, documents, and procedures.

- Delivered multimodal AI assistant (voice and chat) in React Native (Expo).
- Implemented RAG architecture for contextual legal support and document summarization.
- Built admin dashboard with Microsoft SSO and document management.
- Shipped bilingual voice support with realtime transcription and speech synthesis.

Software Engineer, Bitlauncher

Remote • Full-time • Nov 2023 – Nov 2025

AI and crypto launchpad: early access to AI startups via token sales and auctions.

- Architected full-stack platform on Next.js 14, Supabase, viem, and wagmi.
- Built token bridge flows for USDT, USDC, and BITUSD into protocol tokens.
- Integrated Gnosis auction contracts with wallet UX and realtime balance updates.
- Developed custom EVM indexer using WebSocket event subscriptions.
- Integrated AI SDKs and prompting for masterbots.ai.
- Established AI-assisted engineering workflow with Claude, v0.dev, Cursor, and SourceryAI.

Software Engineer, Oryn

Remote • Contract • Oct 2024 – Feb 2025

Decentralized perpetual options protocol on Arbitrum.

- Architected Next.js application structure and data-fetching approach.
- Built trading interface and custom UI for options trading.
- Integrated protocol and Arbitrum testnet with viem and wagmi.
- Indexed onchain data with Ponder, PostgreSQL, and Supabase.
- Prototyped LLM-based assistant for onboarding and support.

Software Engineer, ZTX

Remote • Full-time • Aug 2022 – Aug 2023

Virtual world with cryptocurrency-backed digital asset ownership.

- Implemented WebGL EVM wallet connector with Ethers.js and a custom JavaScript event system.
- Configured analytics and reporting with Google Tag Manager.
- Owned React architecture on Next.js with Tailwind CSS and Framer Motion.

Software Engineer, RareMint

Remote • Full-time • Jul 2021 – Dec 2022

NFT platform for minting, trading, and collecting digital assets.

- Built NFT indexer using Moralis streams, Node.js, and PostgreSQL.
- Improved marketplace responsiveness with Remix, Tailwind CSS, and GraphQL.
- Integrated WalletConnect for wallet connections and transactions.
- Supported launch of first Pokémon card auctions on Polygon.

Lead Engineer, Bitcash

Remote • Part-time • Jan 2020 – Jul 2021

Fiat-to-stablecoin and crypto exchange application.

- Architected full-stack platform: React, Vite, Node.js, PostgreSQL, Hasura GraphQL, Google Cloud.
- Built peer-to-peer exchange, realtime chat, and backend matching engine.
- Developed realtime EOS indexer: Node.js worker threads, binary deserialization, PostgreSQL on Google Cloud.
- Implemented WebAuthn-based key management for in-browser transaction signing without external wallet apps.
- Delivered QR-based signature requests for partner applications using Supabase subscriptions and webhooks.

Software Engineer, Emanate

Remote • Contract • Dec 2019 – Jul 2020

Social platform for artists.

- Maintained and improved streaming web application.
- Built back office for artist token payments.
- Integrated EOS blockchain with AWS backend services.

Lead Engineer, EOS Costa Rica

Hybrid • Full-time • Mar 2018 – Jan 2020

Block producer: infrastructure and blockchain development services.

- Participated in EOS mainnet launch and operated EOSIO-based validators.
- Configured private EOSIO chain for Grant Thornton Labs; shipped MVP for intercompany transactions and tax workflows using a stablecoin, hashing, and IPFS for immutable records.
- Developed EOS Rate frontend with React and Styled Components.
- Led recruiting, onboarding, workshops, and community engagement (e.g., TicoBlockchain.cr, CryptoCantina).

Software Engineer, Knowledge

Remote • Contract • Sep 2017 – May 2018

Tokenized knowledge and expertise platform.

- Deployed ERC-20 token for ICO on Ethereum mainnet using Truffle.
- Built marketplace and wallet dashboard with React and Web3.js.
- Maintained mobile trivia game for token rewards.

Lead Engineer, Wink

On-site • Full-time • Apr 2015 – Mar 2018

Mobile neobank: digital banking and financial services (holawink.com).

- Led backend architecture, integrations, and security.
- Coordinated partner banks and vendors.
- Built biometric KYC with React Native native bridge.
- Integrated partner bank APIs.

Lead UI Engineer, AMC Networks

Hybrid • Full-time • Nov 2012 – Apr 2014

Interactive streaming movie service YEAH! (SXSW 2013 launch): classic genre films with interactive bonus content.

- Led frontend team with creative and backend partners.
- Built interactive video streaming frontend for Facebook application.
- Implemented back-office with Brightcove integration.
- Shipped interactive trivia, interviews, and quizzes in the video player.
- Optimized experiences for curated films with 400+ interactive elements each.

UI Engineer, American Express

On-site • Full-time • Apr 2010 – Nov 2012

Global financial services and card products.

- Contributed to migration from Dojo to jQuery.
- Implemented responsive layouts, A/B testing, and analytics.
- Developed credit card marketing components: comparison sliders and landing pages.

Let's Work Together

I'm open to long term or short term engagements, including direct hire, international hire, or contractor setups through my US-based company, Blockmatic Labs LLC. Based in Costa Rica and aligned with US Mountain Time. Unable to work as W2. Available for travel when needed.
