Costa Rica's first neobank: React Native app, AWS backend, partner-bank APIs, and biometrics (holawink.com).

- Built the React Native app and AWS backend.
- Integrated partner-bank APIs so deposits, transfers, and account data moved through the app.
- Built biometric KYC with a React Native native bridge.

Additional experience

Between those roles I led engineering at EOS Costa Rica (2018–2020) through the EOS mainnet launch and a private-chain MVP for Grant Thornton Labs, and worked on Emanate's streaming platform (2019–2020). From 2021 to 2023 I built an NFT indexer and marketplace at RareMint (2021–2022) and a WebGL wallet connector for ZTX (2022–2023). Earlier I led frontend for AMC Networks' YEAH! (2012–2014) and built card marketing products at American Express (2010–2012).
