

Gabo Esquivel

Senior Product Engineer

I build software products where the interface, the services, and the model or chain underneath have to work as one thing. Recent work is production AI assistants and the product layer around blockchain systems. 15+ years across TypeScript, React, Next.js, and cloud. Fluent in English, Spanish, Portuguese, and Italian.

Highlights

- Shipped a production AI legal assistant with voice, chat, and retrieval in React Native
- Built wallets, token flows, auctions, and trading interfaces across EVM and Antelope
- Led engineering for Wink, Costa Rica's first neobank, from architecture to launch

Skills

- **Languages:** TypeScript, JavaScript, Python, Solidity, SQL
- **AI / ML:** LLMs, AI SDK, RAG, Embeddings, Vector Search, Agent Workflows
- **Web3:** Foundry, Hardhat, Viem, Wagmi, Ponder, Ethers
- **Frontend:** React, Next.js, Tailwind, Shadcn UI, React Native, Expo, Tanstack
- **Backend:** Node.js, PostgreSQL, Supabase, Prisma, Drizzle, GraphQL
- **Cloud & Infra:** AWS, GCP, Azure, Docker, Vercel, Pulumi, Terraform, Serverless

Experience

Software Engineer, LegalAgent

Remote • Contract • 2025

AI legal platform with voice, chat, and retrieval for case context, documents, and procedures.

- Shipped a voice and chat assistant in React Native (Expo).
- Built RAG for case context and document summaries.
- Built the TanStack Start admin with Microsoft SSO, document management, and retrieval categories.
- Shipped bilingual voice with realtime transcription and speech synthesis.

Software Engineer, Bitlauncher

Remote • Full-time • Nov 2023 – Nov 2025

AI and crypto launchpad for token sales, auctions, wallets, and indexed market data.

- Built the launchpad on Next.js 14, Supabase, viem, and wagmi.
- Built token bridge and auction flows with wallet UX and realtime balance updates.
- Integrated AI SDKs and prompting for masterbots.ai.

Software Engineer, Opyn

Remote • Contract • Oct 2024 – Feb 2025

Options protocol on Arbitrum with a trading interface and indexed onchain data.

- Built the Next.js 14 trading interface with React Server Components.
- Indexed onchain data with Ponder, PostgreSQL, and Supabase.
- Prototyped an LLM assistant for onboarding and support.

Lead Engineer, Bitcash

Remote • Part-time • Jan 2020 – Jul 2021

Fiat-to-stablecoin and crypto exchange with peer-to-peer trading, chat, and browser signing.

- Built the React, Vite, Node.js, PostgreSQL, Hasura, and Google Cloud stack.
- Built the peer-to-peer exchange, realtime chat, and matching engine.
- Built WebAuthn key management for in-browser transaction signing without an external wallet.

Lead Engineer, Wink

On-site • Full-time • Apr 2015 – Mar 2018

Costa Rica's first neobank: React Native app, AWS backend, partner-bank APIs, and biometrics (holawink.com).

- Built the React Native app and AWS backend.
- Integrated partner-bank APIs so deposits, transfers, and account data moved through the app.
- Built biometric KYC with a React Native native bridge.

Additional experience

From 2021 to 2023 I built marketplace and virtual-world products: an NFT indexer and marketplace at RareMint (2021–2022), and a WebGL wallet connector for ZTX (2022–2023). Earlier chain work includes EOS Costa Rica (2018–2020), where I led engineering through the EOS mainnet launch and built a private-chain MVP for Grant Thornton Labs; Emanate (2019–2020); and Knowledge (2017–2018), deploying an ERC-20 token and its marketplace. I led frontend for AMC Networks' interactive streaming service YEAH! (2012–2014) and built card marketing products at American Express (2010–2012).

Connect

Open to direct hire, international hire, or contracting through Blockmatic Labs LLC. Based in Costa Rica and working US Mountain Time.
